

## Math 133 – Introduction to Probability & Statistics Course Syllabus – Fall 2016, Sections 40 & 41

---

**Professor:** Steve Tuckey

**Office:** McDivitt Hall, Room 142

**Phone:** 781.523.9805 (call or text; Google Voice number)

**E-mail:** tuckeysteven@jccmi.edu

**MyStatLab Website:** [www.mystatlab.com](http://www.mystatlab.com)

**MyStatLab Course ID:** *See Handout*

**Class Time/Location:** Section 40: T/R 12:00-1:47 PM (Maher Room 101)  
Section 41: T/R 6:00-7:47 PM (Maher Room 209)

**Office Hours:** <http://bit.ly/sftschedule>

**Course Description:** This course is an introduction to experimental design, data representation, basic descriptive statistics, probability theorems, frequency distributions and functions, binomial and normal probability distributions and functions, probability density functions, hypothesis testing, statistical inference, chi-square analysis, linear regression, correlation and application of the above in making informed, data-driven decisions in real-world contexts. Both graphing calculators and computer-based statistical software (Microsoft® Excel) will be used. If the prerequisite is more than two years old the recommendation is the course placement assessment be taken or the prerequisite be retaken to ensure the success of the student.

**Prerequisite:** A 2.0 in MAT 033, 131 or higher, or course placement by exam.

**NOTE:** MAT 030 and 039 are *NOT* acceptable prerequisites for MAT 133.

**Math 133 Core Course Objectives:** Students will be able to:

- Perform a hypothesis test involving means and proportions.
- Create, interpret, and apply graphical displays of data (histograms, bar charts, circle graphs, dot plots, and stem and leaf displays)
- Compute, interpret, and apply descriptive numerical measures (mean, mode, median, range, variance, and standard deviation)
- Compute and apply a linear regression line and Pearson product moment correlation coefficient.
- Compute, interpret, and apply probabilities involving discrete, binomial, normal, and *t*-distributions.
- Compute and apply confidence intervals for means and proportions.
- Use appropriate technology (such as a graphing calculator) to enhance the understanding of previous objectives.
- Knowledge and awareness of statistics in scientific issues and current events

**Math 133 General Education Outcomes:**

GEO 3 – Demonstrate Computational Skills and Mathematical Reasoning

**Course Requirements:**

**Required Materials:** MAT 133 Course Pack (Fall 2016), MyStatLab (a.k.a. MyMathLab) Student Access, LARGE 3-ring binder, LARGE eraser, pencils, highlighters, TI-84 Calculator **required** (Note: TI-83's cannot run the newest operating system, which puts students using them at a significant disadvantage). **Please note: Access to a computer with Internet is required for this section of Math 133.** We will be doing homework, projects, and possibly some quizzes online, outside of class. School computers can be used to satisfy these requirements.

**Optional Textbook:** *Statistics: Informed Decisions Using Data 4th edition*, by Michael Sullivan, III (Publisher: Prentice Hall). **Please note:** This textbook is available online within MyStatLab.

**Online Homework:**

- There is a homework assignment for each section in the course, which must be completed outside of class time on a computer with internet access at MyStatLab.
- Regular homework deadlines will be announced in class and posted online.
- You have an unlimited number of attempts for each homework exercise until the due date. Thus, earning 100% on your homework is possible, provided you are persistent.
- There may also be video lectures assigned and the notes collected in class for some sections of the course.
- There are videos available at <http://www.youtube.com/user/tuckeyalanaj> to help you with completing homework assignments, using the help features, and more.

**In-Class Work:** There will be frequent in-class assignments (turned in for credit). These may be individual or group assignments, closed or open notes at the instructor's discretion. There may also be additional quizzes posted on MyStatLab for students to take outside of class.

**NOTE:** Late homework will NOT be accepted, so you must make arrangements for submitting your work *by the start of class* if absence is unavoidable. One useful tool for this is a free, "scan-to-PDF" app for mobile devices (e.g., "CamScanner" for Android).

**Projects:** There are two mandatory projects in the course that are designed to improve students' statistical and technological skills and connect course concepts with applications. These are done entirely outside of class and will require the use of a computer, the internet, YouTube, and Excel. You can use school computers to complete the project, if necessary.

**Exams:** Due to the nature of the course, every exam will have questions that relate to previous exams. The final exam is cumulative for the whole course. Exams **may not be made up** except under extreme, well-documented circumstances. Whether an exam can be made up is solely up to the professor, so contact him immediately if there is a problem. You will be allowed one page (8.5"x11", front and back) of notes of your own creation (i.e., *excluding copies of pages from the course pack*) for *each* exam. All previous note sheets may be used on the final exam. There will also be instructor-given tables and info sheets on certain exams.

**NOTE:** The final exam is during the *last week* of the course and CANNOT be taken early.

**NOTE:** Due to the large amounts of material in our course, it will be necessary for some exams to be taken at the **Walker Hall Testing Lab**, room 121, on Central Campus. Look over the Testing Lab's policies and procedures here: <https://www.jccmi.edu/testing-lab>.

**Course Policies:****Grading Policy Information:**

A 2.0 or "C" is a passing grade. Only courses with passing grades count toward graduation. Other colleges transfer in only courses with passing grades. Many financial aid sources, including most employers, require passing grades. Additionally, earning less than a 2.0 in a class results in being unable to participate in the next level of courses in a discipline which requires this course as a prerequisite.

**Grading Scale: Weighted Grade Calculation:**

90-100%	4.0
85-89%	3.5
80-84%	3.0
75-79%	2.5
70-74%	2.0
65-69%	1.5
60-64%	1.0
50-59%	0.5
0-49%	0.0

Online MSL Homework: **10%**  
 Worksheets, Quizzes, etc: **15%**  
 Exam 1 (Ch 1-4): **15%**  
 Exam 2 (Ch 5-7): **15%**  
 Exam 3 (Ch 8-10): **15%**  
 Projects: **10%** (5% each)  
 Cumulative Final (Ch 1-10): **20%**

**Extra Credit Policy:** There will be no opportunities for *extra* credit. Your grade is based on your performances on course assignments only.

**Absence Policy:** Students are expected to attend all class meetings, arriving on time, and staying until the end. We do a variety of in-class activities involving other students and group participation and therefore cannot be made up outside of class for any reason. If absence is unavoidable the **student is responsible** for obtaining the missed lecture notes from another student (or by watching the online YouTube lecture videos). Please remember that office hours are not a replacement for class time. See the "**In-Class Work**" section above for dealing with missed assignments due to absences.

**Important Dates:** Be sure to check out the JC Academic Calendar for important dates such as holidays with no classes, graduation, etc. at <https://www.jccmi.edu/academics/academic-calendar>

**Incompletes Policy:** A student may request an incomplete from the instructor. The College's incomplete policy will be followed if an "I" is requested. Final determination of whether an incomplete will be given is the instructor's decision.

**NOTE:** Requesting an "Incomplete" grade is *not* a valid strategy for avoiding failure

**Intermediate Grading:** To comply with college policy and federal regulations you will receive three intermediate grades during the semester. The grades assigned are letters with the following meanings:

- **V:** Verifies that you are participating and your work so far has been acceptable
- **H:** Means that you are participating, but your work shows that you may require Help in order to complete the class successfully.
- **Q:** Means that you have quit participating in the course. If you receive a Q grade, you will automatically be withdrawn from the course.

**Academic Honesty Policy:** You are *encouraged* to talk to each other, but all your work must be your own. "Group-work" is a great way to learn material, but anything you submit must be yours; reflecting your own thought processes, not those of another. I will follow JC's Academic Honesty Policy and take appropriate action up to and including assigning a **failing grade** for the assignment, project, exam, or the course itself (whichever I deem necessary). The policy can be seen here: <https://www.jccmi.edu/wp-content/uploads/1004.pdf>

**Classroom Behavior Policy:**

**1. Be Responsible:** for your work, for your learning, for your behavior in class, etc.

The online homework and take-home worksheets will require responsibility and organization on your part. You will need to stay on top of your schedule and your life to make sure that all coursework is done in a timely fashion. The single most common piece of advice given by successful students in this course to those about to take it is simply: ***Keep up with your homework and don't fall behind.***

**2. Be Respectful:** of other students, of the instructor, of the material, of yourself..

Turn OFF your cell phones, no chewing tobacco, come on time, stay the full time, be prepared to answer questions and work together. These are regularly classroom rules for good reason -- distractions (especially from electronic devices) damage your ability to focus, and that of the people around you. **Classrooms work best when everyone is focused and prepared.**

## Where to Get Help...

**Office Hours:** Office hours are there for you to come get help. Please come and see me if you need questions answered. Remember, though, that office hours are not a replacement for attending class.

**Center for Student Success:** The Center for Student Success has tutoring available for free to students enrolled in Math 133. You can get help with take-home work, MyStatLab homework, and more. The Center is located in Bert Walker Hall. Their phone number is 517-796-8415

**SI Leaders:** Some sections of 133 may have Supplemental Instruction Leaders who will have sessions that are *open to all 133 students*. For more information, contact the Center for Student Success.

**YouTube Videos:** Lead Faculty Alana Tuckey has created hundreds of videos showing for this course including lectures, Excel, the calculator, tricky MSL problem-walkthroughs, and more. Go to: <http://www.youtube.com/user/tuckeyalanaj> and check out the **133 playlists**.

**MyStatLab:** There are videos, extra problems, sample exams, lecture notes, PowerPoint lectures and more available in MyStatLab. It's a great resource!

**Each Other:** Get a regular study group. Write down names and numbers of your peers and call on each other when needed!

## Math 133 – Tentative 15-Week Schedule

**2 hours, twice a week**

Day	Date	Material Covered	Topics
1		1.1, 3.1	Introduction to Statistics; Measures of Center
2		1.3, 3.2	Measures of Spread
3		3.3-3.4	Weighted Mean; Measures of Position
4		3.4-3.5	Measures of Position; Boxplots
5		1.2, 1.6, 4.1	Correlation
6		4.2	Linear Regression
7		4.3	Residual Plots
8		Review for Exam 1	
9		5.1	Basics of Probability
10		5.2	Addition Rule
11		5.3	Multiplication Rule
12		4.4, 5.4	Contingency Tables; Conditional Probability
13		5.4	Conditional Probability
14		6.1-6.2	Discrete Probability Distributions; Start Binomial Distribution
15		6.2, 7.1	Binomial Distribution; Normal Distribution
16		7.2	Normal Distributions
17		7.3, Review for Exam 2	Normal Probability Plot; Review for Exam 2
18		1.5, 8.1	Bias in Sampling; Distribution of Sample Means
19		8.1-8.2	Distribution of Sample Means; Distribution of Sample Proportions;
20		9.1	Confidence Intervals for Proportions
21		9.2	Confidence Intervals for Means
22		9.3	Confidence Intervals for St. Dev.
23		9.4	More with Confidence Intervals
24		10.1	Basics of Hypothesis Testing
25		10.2	Hypothesis testing with Proportions and Means
26		10.3	Hypothesis testing with Means
27		10.4	Hypothesis testing with Standard Deviation
28		9.5, 10.5, Review for Exam 3	Review for Exam 3
29		Review for Final Exam	Review
30		<b>Final Exam</b>	

**NOTE!!** This schedule is subject to change as the course progresses. To know exactly what was covered, *you must attend class!*
