

Hello Everyone,

As you all know by now, all classes at Jackson College will be online starting on Monday, March 23, 2020. We will have classes in this format until further notice.

Our class will start on Tuesday, March 24, 2020.

We have all been working very diligently to create the best classroom experience we possibly can for you during this unexpected turn of events.

I have decided to conduct our classes with you during our regularly scheduled class times.

On Tuesday and Thursday, we will have a regular class session. I will teach the MAT 154 notes via a platform called ZOOM; and you will ask questions before I teach the notes and after.

- **It is imperative that you download the ZOOM application to both your laptop computer and your phone, before we have our first class meeting on Tuesday.**
- **Instructions have been provided in the given attachments.**
- **You can simply go to the App Store on your phone and search ZOOM**
- **On your computer, search for ZOOM download.**
- We will have our first class on Tuesday, March 24 at the regularly scheduled class time.
- I will be sending you a ZOOM link invitation to "join a session" through your Jackson College Email.
-
- You will simply click on the ZOOM link invitation to ZOOM link invitation to "join a session" before class begins or when the class begins, and join the session.
- It truly is an easy process. (Especially if all of I could learn how to use this in just two days time!)

We will all be able to see each other as we join the class.

We will all be able to talk to one another as well.

On the first ZOOM session, I will go over the Syllabus Update that was also attached at the top of the page....then we will proceed to the notes where we left off before spring break.

All of this will be much clearer after our first class on Tuesday via ZOOM.

For now, please **download the ZOOM application to both your laptop computer and your phone, before we have our first class meeting on Tuesday.**

I am really looking forward to seeing all of you in class on Tuesday via ZOOM.

Sincerely,

Mona Baarson

P.S. Please know that I will be updating MyMathLab in the near future. This week has been extremely busy learning how to teach in a virtual environment and getting everything to you by today. The learning part has been quite interesting and actually fun, but time has been really short to get absolutely everything done. So bear with me. We will successfully make it through this together just in a different way!
